

## DSL-300

### WATER SOLUBLE ECOLOGICAL DEGREASER AND CLEANER BIODEGRADABLE

- INTRODUCTION:** DSL-300 is an industrial degreaser made from solvents of natural origin and corrosion inhibitors that allow to quickly remove dirt and grease. It allows cleaning and degreasing all types of machinery, floors, pipes, countertops, metallic structures and industrial surfaces in general. It does not contain aromatic solvents (no VOC) and is soluble in water. Easily removes grease, oil, carbon black, and rubber. It does not corrode metal surfaces and is biodegradable.
- SPECS:** DSL-300 presents the following characteristics:
- |                       |                        |           |
|-----------------------|------------------------|-----------|
| % Solids (55°C, 2 h): | 16.00+/-6.0            | ASTM D460 |
| Appearance:           | Amber or yellow liquid |           |
| Biodegradability:     | It is biodegradable    | OECD 301  |
- FUNCTIONALITY:** DSL-300 can be used pure or diluted in water, depending on the degree of soiling.
- APPLICATION:** Apply to surface, allow solution to act for 2 or 3 minutes, scrub with brush or wipe and then rinse. In case of use on surfaces that have contact with food, children, toys or pets, be sure to rinse after leaving the product to act.
- HANDLING:** DSL-300 is no toxic. It does not present hazard conditions. Normal general security practice is necessary. Wear rubber gloves, goggles and mask. Avoid contact with skin and eyes.
- STORAGE:** DSL-300 must be stored between 2 °C to 60 °C. Freezing must be avoided.
- PACKAGING:** DSL-300 is available in 5, 15 or 55 gallon containers.
