WATER-SOLUBLE BIODEGRADABLE ECOLOGICAL DEGREASER AND CLEANER DSL-300

INTRODUCTION:	DSL-300 is an industrial degreaser made from solvents of natural origin and corrosion inhibitors that quickly remove dirt and grease. It allows cleaning and degreasing all types of machinery, floors, pipes, countertops, metal structures and industrial surfaces in general. It does not contain aromatic solvents (no VOC) and is soluble in water. It easily removes grease, oil, carbon black and rubber. It does not corrode metal surfaces and is biodegradable.		
SPECIFICATIONS:	DSL-300 presents the following characteristics:		
	% Solids (55°C, 2 h):	16.00 +/- 6.0	ASTM D460
	Appearance:	Amber or yellow liquid	
	Biodegradability:	Biodegradable	OECD 301
FUNCTIONALITY:	DSL-300 can be used pure for greater effectiveness or diluted in water, depending on the degree of soiling.		
APPLICATION:	Apply to the surface, allow the solution to act for 2 or 3 minutes, scrub with a brush or cloth and then rinse. When used on surfaces in contact with food, children, toys or pets, be sure to rinse after letting the product act.		
HANDLING:	DSL-300 is non-toxic. Normal safety and handling practices are required. Wear rubber gloves, safety goggles and a face mask when handling the product. Avoid contact with skin and eyes.		
STORAGE:	DSL-300 must be stored between 2°C and 60°C. Freezing must be avoided.		
PACKAGING:	DSL-300 is available in 5, 15 and 55 gallon containers.
